This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

TRANSPORTATION BUILDING.—FROM THE NORTHEAST.

Architects, Adler & Sullivan, of Chicago. The main building is 960 by 256 feet, and the annex, which is unsymmetrical in form, measures on its different sides 800, 625, 869 and 286 feet, respectively. The total acreage is about fifteen acres. The leading architectural features of the building are the central cupola, 165 feet high, and the main portal on the east side, commonly called the Golden Door. The statues and bas-reliefs are by John J. Boyle, and the exterior color decoration of the main building is by Healy & Millet, of Chicago.

MANUFACTURES BUILDING.—FROM THE SOUTHWEST.

Architect, George B. Post, of New York City. Dimensions, 1,687 by 787 feet. The floor area is about 31 acres, or, including the galleries, over 40 acres. This is the largest building ever constructed under a single roof. The main architectural features are the four grand portals, built in the form of triumphal arches, and the great central hall, with the immense steel trusses forming an unbroken span of 380 feet and a height of 211 feet. The sculpture work on the portals and the corner pavilions is by Karl Bitter. The domes in the south portal were decorated by Robert Reid and J. Alden Weir, those in the east portal by Kenyon Cox and E. E. Simmons, those in the north portal by Walter Shirlaw and J. Carroll Beckwith, and those in the west portal by E. H. Blashfield and C. S. Reinhart.

AGRICULTURAL BUILDING.—FROM ACROSS THE BASIN.

Digitized by Google

Architects, McKim, Mead & White, of New York City. The dimensions of the main building are 800 by 500 feet, and of the annex 550½ by 312 feet. The entire floor area is about fifteen acres. The decorations of the porticoes and pavilions are by George W. Maynard, the figure of Diana, surmounting the dome, is by Augustus St. Gaudens, the composition in the main pediment is by Larkin G. Mead, and the remainder of the sculpture is by Philip Martiny.

ART BUILDING.—FROM THE SOUTHEAST.

Architect, Charles B. Atwood, designer-in-chief of the World's Columbian Exposition. The main building is 500 by 320 feet, and each annex 220 by 136 feet. The floor area is about five acres, and the wall space for hanging pictures amounts to nearly 150,000 square feet. The colossal portrait-heads of famous masters are by Olin L. Warner, and the caryatides, the figures on the main gables and the colossal statue Victory on the main dome are by Philip Martiny.

ELECTRICITY BUILDING.—FROM THE NORTHEAST.

Architects, Van Brunt & Howe, of Kansas City. Dimensions, 690 by 345 feet. Floor area, five and one-half acres. The chief architectural feature of this building is the great hemicycle on the south facade. The colossal statue of Franklin under this hemicycle is by Carl Rohl-Smith, the figures flanking the great pylon above the hemicycle are by James A. Blankingship and H. A. MacNeil, and the pediments on the south, east and west facades are by Richard W. Bock. The decorations in the nemicycle and the porticoes are by F. J. Sarmiento & Co., of Detroit, Mich.
